HOW DO I FIND PEER REVIEWED ARTICLES?

What is peer review?

Peer review is a process in which an article submitted to a journal for publication is reviewed and critiqued by other subject matter experts.

These experts determine if the article is worthy of publication.

Publication date:

In the database, once you've entered your keywords, look for a button that says "Peer Reviewed," "Scholarly Journals," "Academic Journals," or even just "Journals."

This option may look different in different databases.

With that option checked, your search should only be showing you results that have been published in academic journals.

Editorials

Book Reviews

Commentaries

However, keep in mind that not everything published in a peer-reviewed journal is a peer-reviewed article.

Academic journals publish editorials, book reviews, commentaries and short other pieces.

If you are unsure, do one last visual check.

The full-text of articles will often include labels or cues that identify the text type.

Also, check the page length -- If an article is a few pages or less, it is most likely not a peer reviewed article.
